White Mountains Community College and the North Country Health Consortium's Science, Technology, Engineering, Mathematics, and Health careers (STEM - Health) camp is an outreach program supported by the New Hampshire Experimental Program to Stimulate Competitive Research (EPSCoR) and sponsored by White Mountains Community College and the North Country Health Consortium.

This STEM - Health camp is designed to broaden middle school students' understanding of STEM applications and health careers.

The camp engages students entering grades 6 through 8 in problem-solving and hands-on activities as they explore areas of science, technology, engineering, mathematics, and health careers.

This camp is designed to be introductory and project - based for students who are interested in the world around them and the way things work. Students should have a desire to engage in scientific inquiry and be interested in science, technology, engineering, mathematics, and health careers.

Students will be very active. WMCC is handicapped accessible. If you have a child in need of individual instructional aids, please discuss your concerns with Rachel Dandeneau by calling 603-342-3023 or email rdandeneau@ccsnh.edu prior to registering your child for STEM—Health camp.

WHITE MOUNTAINS COMMUNITY COLLEGE

Registration Information

Due to the generosity of the Community College System of New Hampshire Foundation, this year's camp tuition is \$279.

Scholarships up to \$ 129 are available, upon request and need.

Registrations and tuition may be submitted by mail or in person to:
