NH DHHS COVID-19 Update – November 12, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Thursday, November 12, 2020, DHHS announced 323 new positive test results for COVID-19, for a daily PCR test positivity rate of 2.6%. Today's results include 270 people who tested positive by PCR test and 53 who tested positive by antigen test. There are now 2,528 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are forty individuals under the age of 18 and the rest are adults with 56% being female and 44% being male. The new cases reside in Rockingham (70), Strafford (56), Hillsborough County other than Manchester and Nashua (42), Merrimack (27), Coos (24), Carroll (13), Belknap (11), Grafton (9), Cheshire (6), and Sullivan (3) counties, and in the cities of Nashua (28) and Manchester (23). The county of residence is being determined for eleven new cases.

Four new hospitalized cases were reported. There are currently 64 individuals hospitalized with COVID-19. This census may include out of state residents hospitalized in NH and/or individuals readmitted to the hospital, therefore increases in the daily hospital census may not always equal the number of new hospitalizations reported in a given day. Four of the new cases had no identified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases are either associated with an outbreak setting or have had close contact with a person with a confirmed COVID-19 diagnosis.

DHHS has also announced three additional deaths related to COVID-19. We offer our sympathies to the family and friends.

- 2 female residents of Hillsborough County, 60 years of age and older
- 1 male resident of Coos County, 60 years of age and older

In New Hampshire since the start of the pandemic, there have been a total of 13,470 cases of COVID-19 diagnosed with 804 (6%) of those having been hospitalized.

Current Situation in New Hampshire

**New Hampshire 2019 Novel Coronavirus (COVID-19) Summary Report
(data updated November 12, 2020, 9:00 AM)**

NH Persons with COVID-19 ¹	13,470
Recovered	10,447 (78%)
Deaths Attributed to COVID-19	495 (4%)
Total Current COVID-19 Cases	2,528
Persons Who Have Been Hospitalized for COVID-19	804 (6%)
Current Hospitalizations	64
Total Persons Tested at Selected Laboratories, Polymerase Chain Reaction (PCR) ²	375,048
Total Persons Tested at Selected Laboratories, Antibody Laboratory Tests ²	32,523
Persons with Specimens Submitted to NH PHL	53,878
Persons with Test Pending at NH PHL ³	755
Persons Being Monitored in NH (approximate point in time)	5,650

¹Includes specimens positive at any laboratory and those confirmed by CDC confirmatory testing.

²Includes specimens tested at the NH Public Health Laboratories (PHL), LabCorp, Quest, Dartmouth-Hitchcock Medical Center, Mako, certain hospital laboratories, the University of New Hampshire and their contracted laboratory, and those sent to CDC prior to NH PHL testing capacity.

³Includes specimens received and awaiting testing at NH PHL. Does not include tests pending at commercial laboratories.
