NH DHHS COVID-19 Update – November 5, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Thursday, November 5, 2020, DHHS announced 252 new positive test results for COVID-19, for a daily PCR test positivity rate of 1.8%. Today's results include 204 people who tested positive by PCR test and 48 who tested positive by antigen test. There are now 1,546 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are thirty-five individuals under the age of 18 and the rest are adults with 53% being female and 47% being male. The new cases reside in Rockingham (65), Hillsborough County other than Manchester and Nashua (33), Strafford (32), Merrimack (21), Coos (18), Belknap (7), Carroll (7), Grafton (6), Cheshire (5), and Sullivan (4) counties, and in the cities of Manchester (21) and Nashua (20). The county of residence is being determined for thirteen new cases.

One new hospitalized case was reported. There are currently 44 individuals hospitalized with COVID-19. This census may include out of state residents hospitalized in NH and/or individuals readmitted to the hospital, therefore increases in the daily hospital census may not always equal the number of new hospitalizations reported in a given day. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have either had close contact with a person with a confirmed COVID-19 diagnosis or are associated with an outbreak setting.

DHHS has also announced two additional deaths related to COVID-19. We offer our sympathies to the family and friends.

- 1 female resident of Hillsborough County, younger than 60 years of age
- 1 male resident of Hillsborough County, 60 years of age and older

In New Hampshire since the start of the pandemic, there have been a total of 11,808 cases of COVID-19 diagnosed with 788 (7%) of those having been hospitalized.

Current Situation in New Hampshire

**New Hampshire 2019 Novel Coronavirus (COVID-19) Summary Report
(data updated November 5, 2020, 9:00 AM)**

NH Persons with COVID-19 ¹	11,808
Recovered	9,776 (83%)
Deaths Attributed to COVID-19	486 (4%)
Total Current COVID-19 Cases	1,546
Persons Who Have Been Hospitalized for COVID-19	788 (7%)
Current Hospitalizations	44
Total Persons Tested at Selected Laboratories, Polymerase Chain Reaction (PCR) ²	356,358
Total Persons Tested at Selected Laboratories, Antibody Laboratory Tests ²	32,326
Persons with Specimens Submitted to NH PHL	52,911
Persons with Test Pending at NH PHL ³	167
Persons Being Monitored in NH (approximate point in time)	4,875

¹Includes specimens positive at any laboratory and those confirmed by CDC confirmatory testing.

²Includes specimens tested at the NH Public Health Laboratories (PHL), LabCorp, Quest, Dartmouth-Hitchcock Medical Center, Mako, certain hospital laboratories, the University of New Hampshire and their contracted laboratory, and those sent to CDC prior to NH PHL testing capacity.

³Includes specimens received and awaiting testing at NH PHL. Does not include tests pending at commercial laboratories.
