## **Coronavirus Disease 2019 (COVID-19) Outbreak, Update # 40** ***Pause Administration of Johnson and Johnson Janssen COVID-19 Vaccine***

### **CDC Announcement to states on April 13, 2021:**

- CDC and FDA are reviewing data involving six reported U.S. cases of cerebral venous sinus thrombosis (CVST) in combination with thrombocytopenia in individuals after receiving the Johnson & Johnson (J&J) Janssen COVID-19 vaccine. All six cases occurred among women between the ages of 18 and 48 years old, and symptoms occurred 6 to 13 days after vaccination. One case was fatal and one is in critical condition.
  - As of April 12, more than 6.8 million doses of the J&J vaccine have been administered in the U.S.
  - NH DHHS has distributed more than 37,000 doses in New Hampshire; the federal vaccine administration program has also distributed doses
- CDC will convene a meeting of the Advisory Committee on Immunization Practices (ACIP) April 14 2021 to review these cases and then FDA will review that analysis. Until then, CDC and NH DHHS recommend a pause in the use of the J&J vaccine out of an abundance of caution.
  - Administration of the mRNA vaccines (Pfizer and Moderna) should continue
  - NH DHHS is working with vaccine administration partners to ensure they are adjusting their operations to accommodate this pause and to provide an alternative supply of the vaccine to continue operations
- Clinicians should be prepared to recognize and manage this potential adverse event
  - People who have received the Johnson and Johnson (Janssen) vaccine who develop severe headache, abdominal pain, leg pain, or shortness of breath within three weeks after vaccination should be evaluated
  - Recommendations for treatment are not yet available, except that use of heparin may be dangerous, so, if anticoagulation is necessary, non-heparin alternative anticoagulants are indicated
  - Health care providers are asked to report adverse events to the Vaccine Adverse Event Reporting System ([VAERS](#))
- NH DHHS is working with vaccine administration partners to provide an alternative supply of the mRNA vaccines to continue operations
- NH DHHS will review this event in available detail during the weekly healthcare provider call detailed below.

**Weekly Partner Calls For:**

- **Long-term care facilities and congregate living settings** first and third Wednesdays from 11:45 am – 1:00 pm, in partnership with the NH Healthcare Association (NHHCA):
  - Zoom link: <https://zoom.us/j/511075725>
  - Call-in phone number: (929) 205-6099
  - Meeting ID: 511 075 725
  - Password: 092020
- **Educational and childcare partners** first and third Wednesdays from 3:30 – 4:30 pm:
  - Zoom link: <https://nh-dhhs.zoom.us/j/98062195081>
  - Call-in phone number: (646) 558-8656
  - Meeting ID: 980 6219 5081
  - Password: 197445
- **Healthcare providers and other public health partners** every Thursday from 12:00 – 1:00 pm; these calls focus on new science, medical, and vaccine updates:
  - Zoom link: <https://zoom.us/s/94841259025>
  - Call-in phone number: (646) 558-8656
  - Meeting ID: 948 4125 9025
  - Password: 003270

# THIS IS AN OFFICIAL NH DHHS HEALTH ALERT

- For any questions regarding this notification, please call the NH DHHS, DPHS, Bureau of Infectious Disease Control at (603) 271-4496 during business hours (8:00 a.m. – 4:30 p.m.).
- If you are calling after hours or on the weekend, please call the New Hampshire Hospital switchboard at (603) 271-5300 and request the Public Health Professional on-call.
- To change your contact information in the NH Health Alert Network, please send an email to [DHHS.Health.Alert@dhhs.nh.gov](mailto:DHHS.Health.Alert@dhhs.nh.gov).

Status: Actual  
Message Type: Alert  
Severity: Moderate  
Sensitivity: Not Sensitive  
Message Identifier: NH-HAN 20210413 COVID-19, Update 40
