

CHILDHOOD LEAD POISONING in NH

THURSDAY
SEPTEMBER 5, 2019 1-3PM
Lunch provided at 12:30

North Country Community Leaders Need to Know

- **Lead's significant negative impact** on cognitive ability, speech and language, hearing, visual-spatial skills, attention, impulse control, social behaviors, emotional regulation, and motor skills— even at low levels of exposure
- Recent NH legislation requiring **blood lead level testing** at ages 1 & 2
- **How to improve** childhood lead poisoning prevention
- Why some NH communities are requiring the results of blood level tests documented on school entry health forms and taking other initiatives to **prevent lead exposure among their youngest citizens**

Location

North Country Health
Consortium
262 Cottage St. Suite 230
Conference Room
Littleton, NH 03561
