

COVID-19 in New Hampshire

November 5, 2020

Beth Daly, DrPH, MPH

Chief, Bureau of Infectious Disease Control

Incident Commander, Public Health COVID-19 Response

Agenda

- Response Overview
- Current Situation
- Contact Tracing
- Vaccine Planning

New Hampshire Response

What is Community Mitigation?

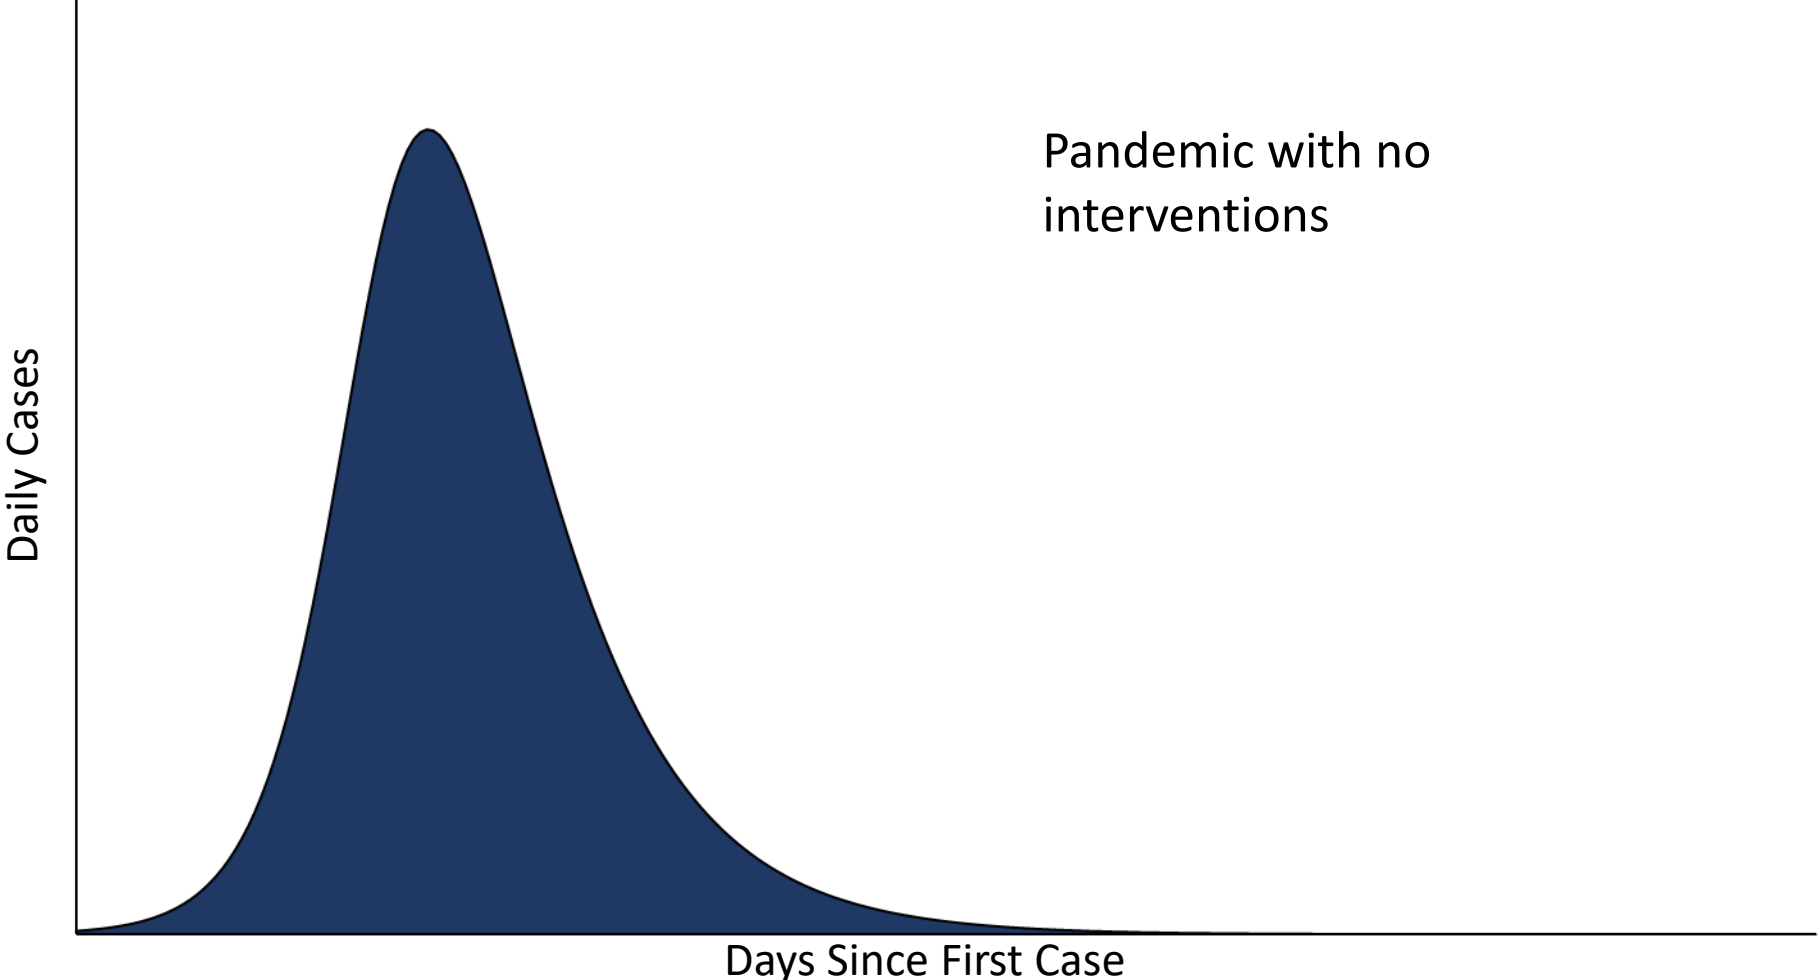

Community mitigation is a package of actions that don't involve medicines or vaccines and are important for stopping the spread of COVID-19:

1. Staying home
2. Keeping a safe distance of at least 6 feet from others
3. Moving to remote learning for schools
4. Encouraging tele-work for businesses
5. Cancelling mass gatherings
6. Closing non-essential businesses

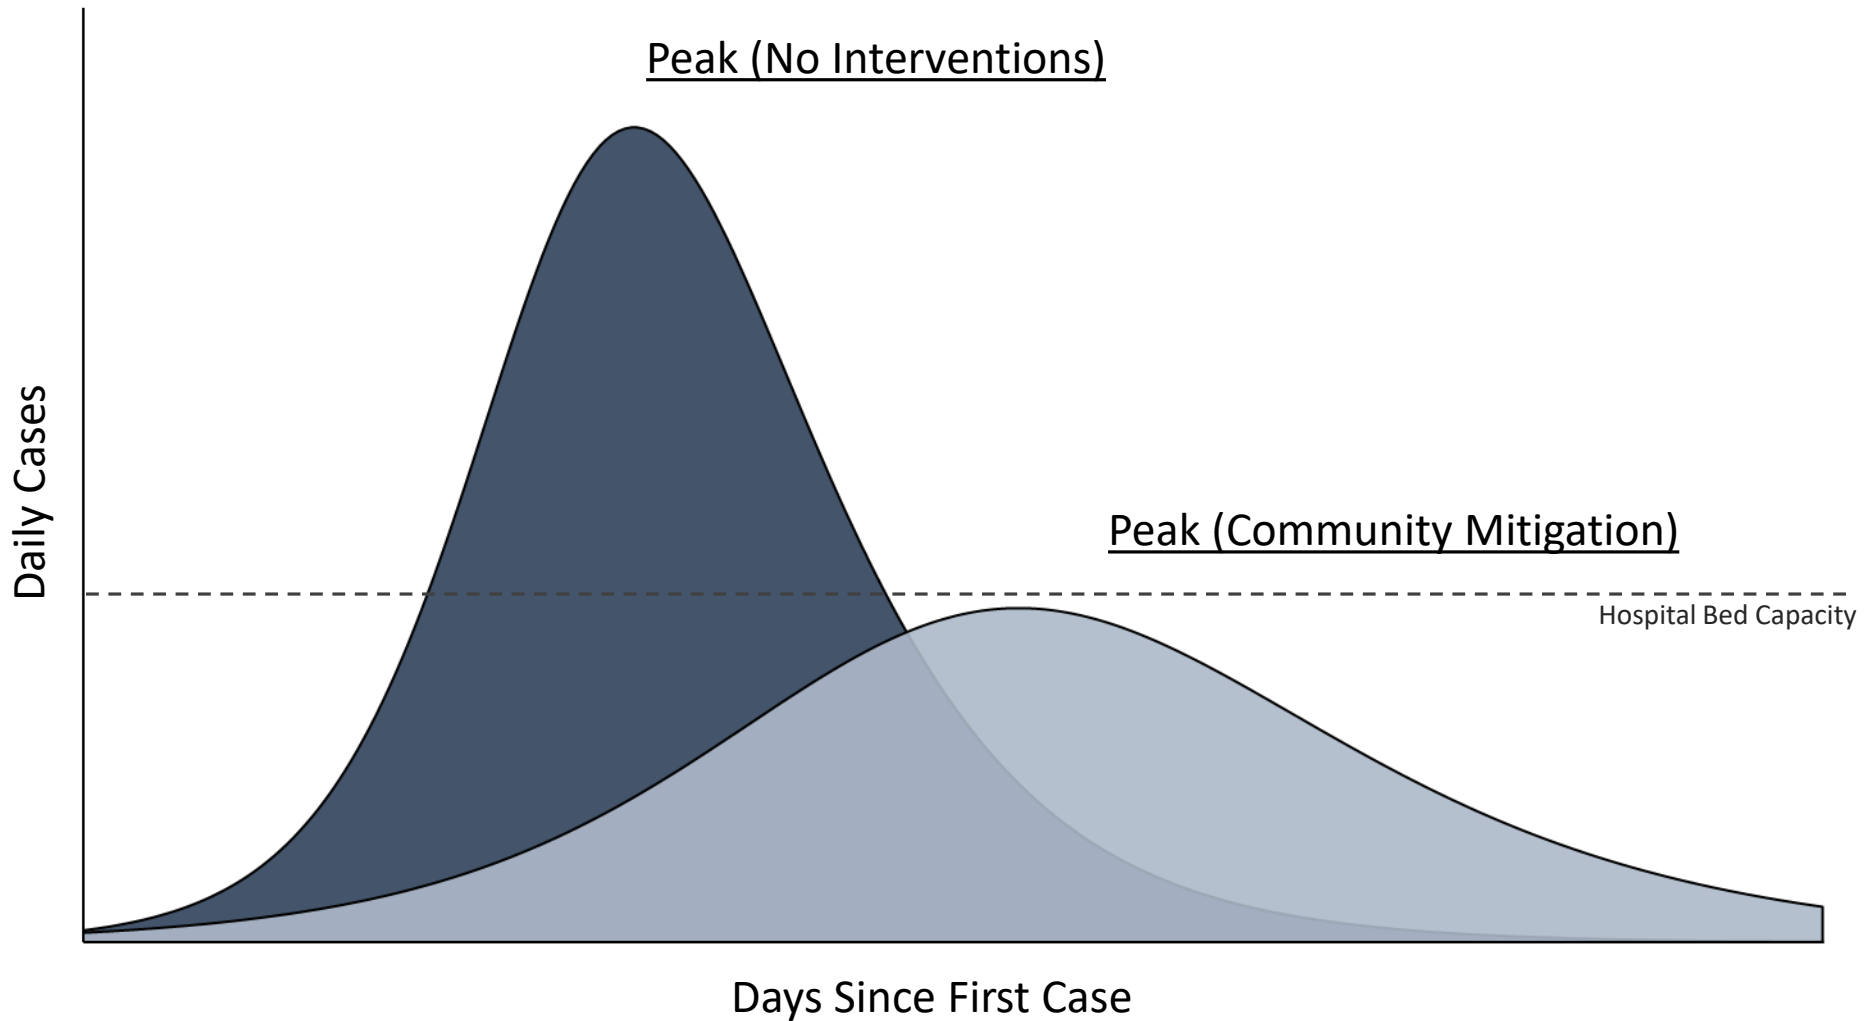

Goals of Community Mitigation

1. Slow how fast the epidemic is spreading
2. Spread out when people get sick (delay the peak)
3. Reduce the overall number of patients
4. Decrease deaths
5. Prevent overwhelming our healthcare system

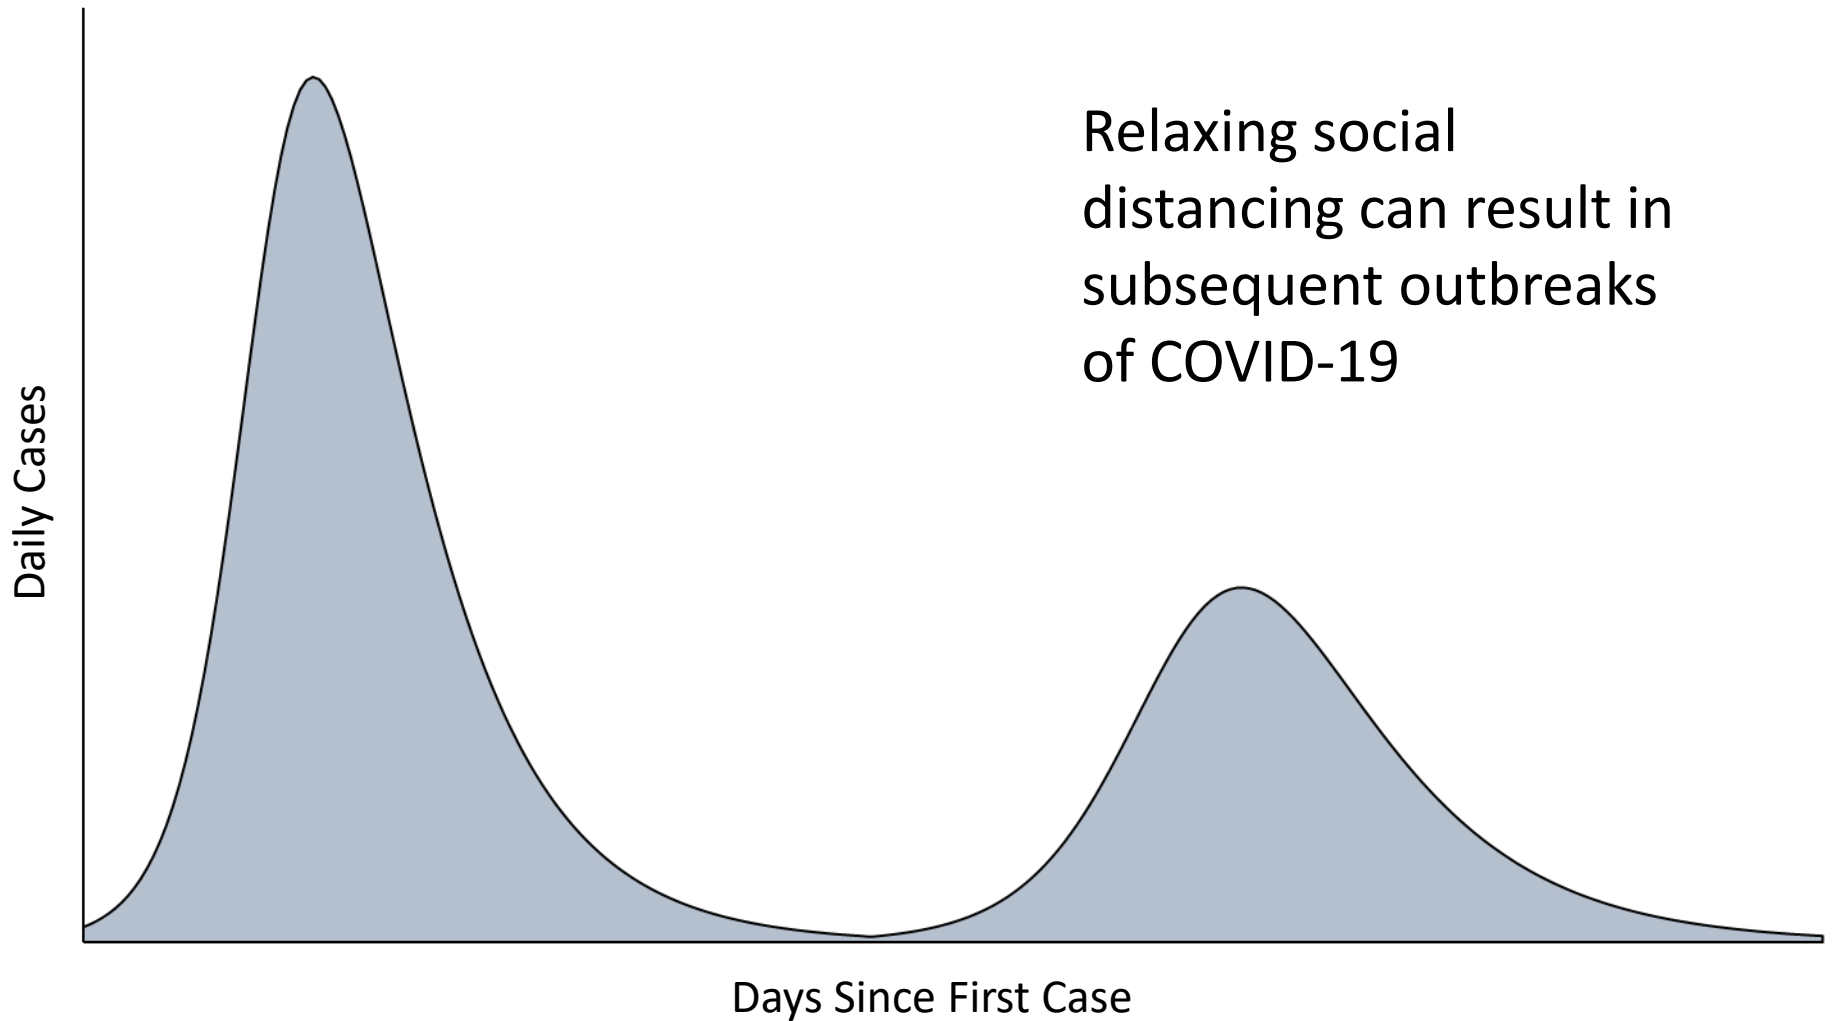

Goals of Community Mitigation

We Can Decreased Hospitalizations

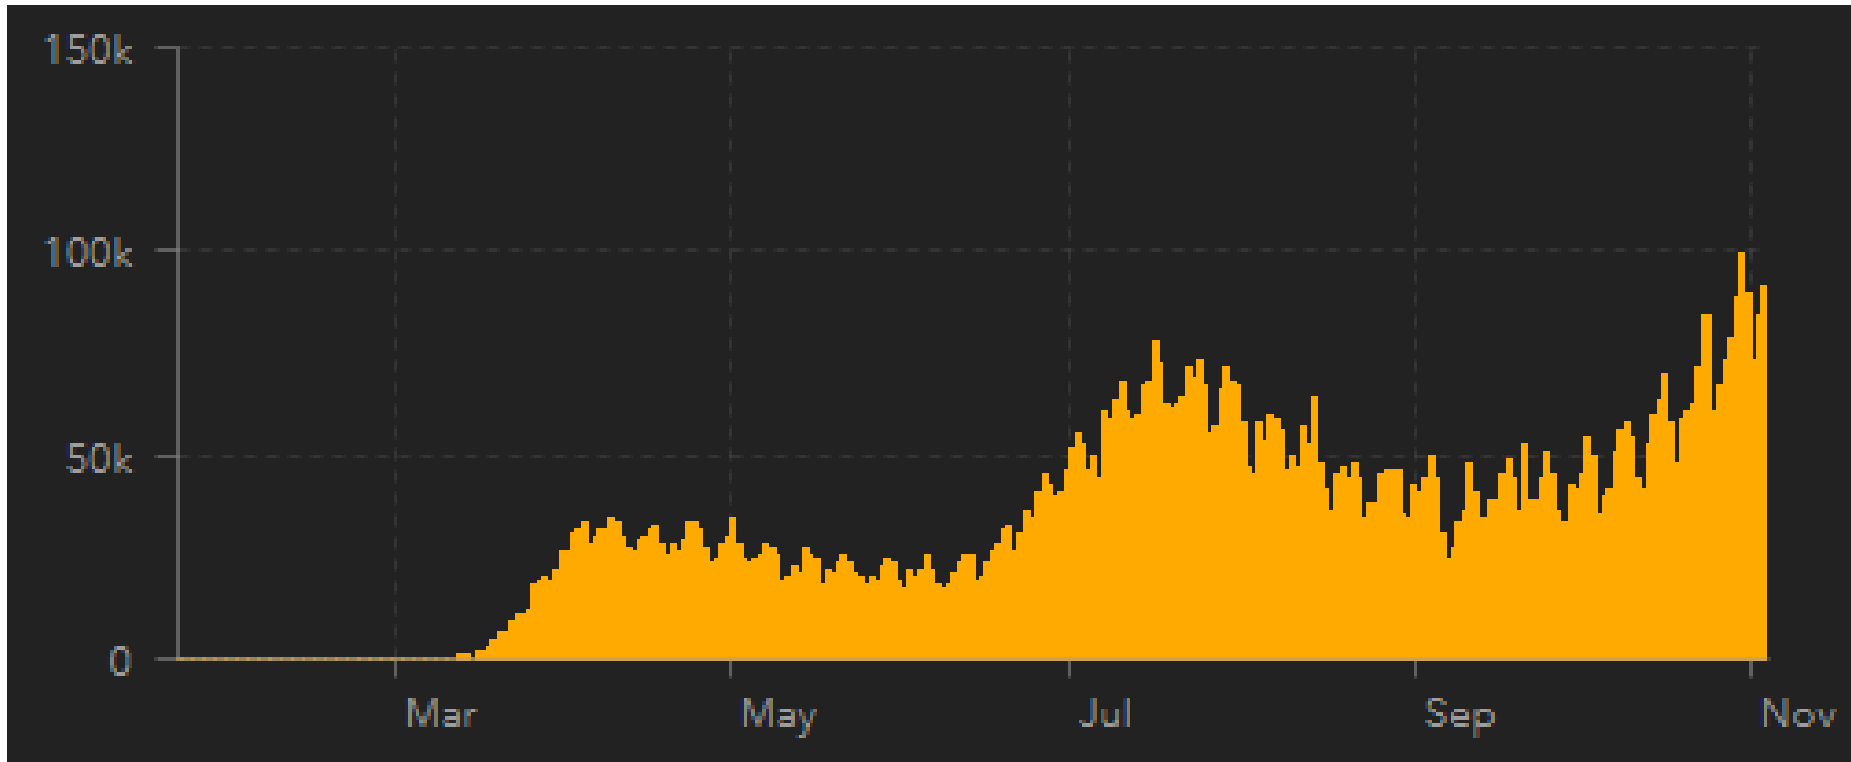

Relaxing Social Distancing

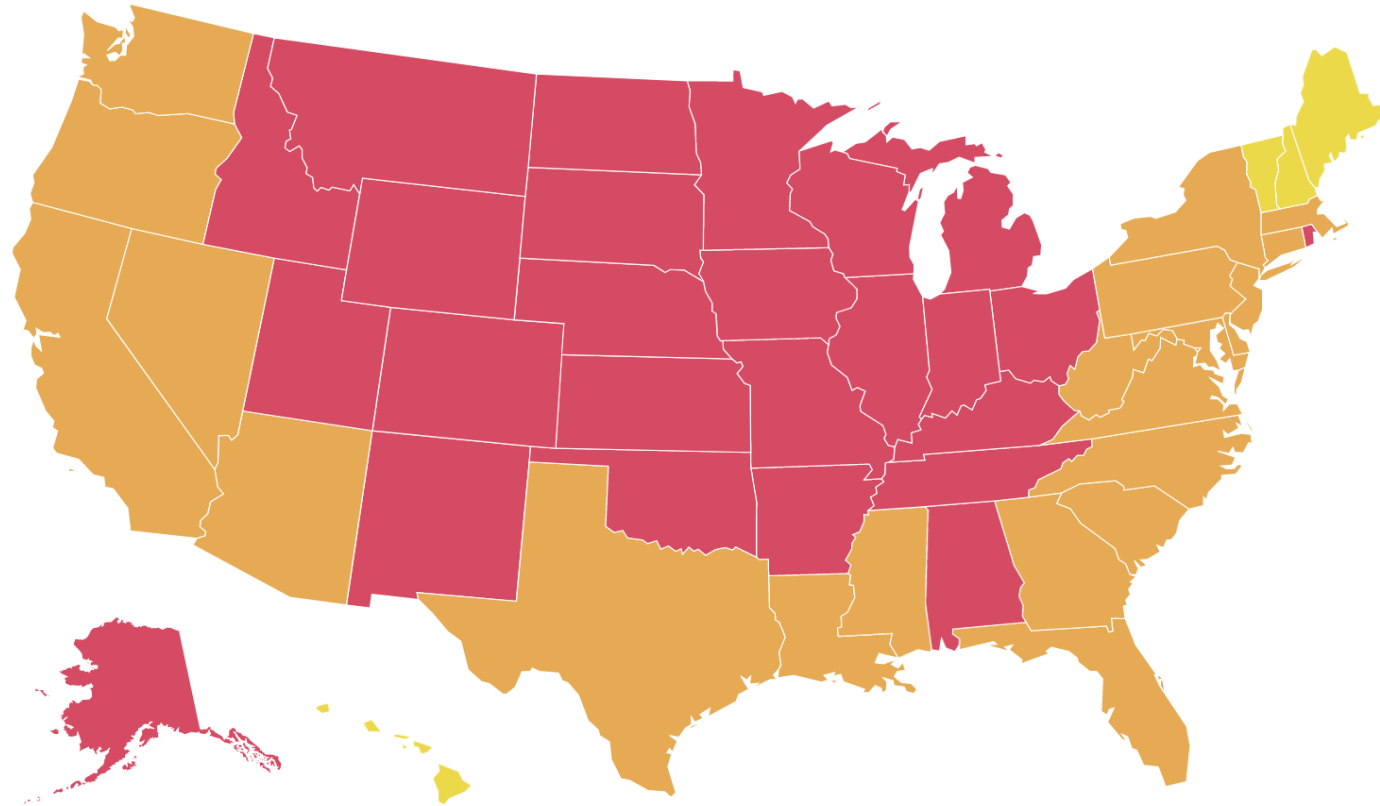

U.S. Epidemic Curve

(new cases per day)

Number of Daily New Cases per 100,000 Population (7-Day Rolling Average)

Risk Levels: ■ Green ■ Yellow ■ Orange ■ Red
